The Joy of A Cool Kitchen

It's an afternoon in midsummer. Outside, the sun is beating down—too hot to work or play. Inside, however, the children can play to their hearts' content, for the kitchen is cool.

Even though the roast for dinner tonight is in the oven, the room is not heated up. Electric cooking is cool cooking because all of the heat goes into the food—none is dissipated into the kitchen.

Clean, convenient, economical—the Electric Range also gives you the joy of a cool kitchen. Ask us about our easily arranged purchase terms.
